

In the specification at page 20, beginning at line 6, please amend the paragraph as follows:

The data originating at the CBU, CBU CPU or SCC is combined at the CBU by the CBY APT 45 and CBU CPU 18. In some cases this may be done at the SCC. The SCC functions may also be incorporated into the CBU CPU 18 eliminating the need for a separate SCC.

In the specification at page 20, beginning at line ¹⁸6, please amend the paragraph as follows: SB 9-14-09

The local central processing unit 18 may be connected to any type of storage (item [32] 22) to store data for any period of time in order to allow the remote user to acquire data which was not previously sent. Preferably this storage at item 22 would be sent to item 38 as soon as possible to prevent loss at the local phone because of damage, overload, etc.

In the specification at page 20, beginning at line 21, please amend the paragraph as follows:
